PHD STUDENTS

Lorenzo Ferreri (11/2022 -). Lorenzo is a PhD student at Scuola Normale Superiore (Pisa). He is working on the regularity of the free boundaries arising in geometric variational problems. He is also member of the team on the project ERC VaReg.

Baptiste Trey (09/2016 - 06/2020). The thesis was financed by the collaborative project GeoSpec (2016-2020) between Laboratoire Jean Kuntzmann - LJK and Institut Fourier - IF and was co-advised by myself (LJK, 50%) and Emmanuel Russ (IF, 50%). Using different advanced techniques from the free boundary regularity theory, Baptiste proved new regularity results for several different classes of shape optimization problems.

François Générac (09/2017 - 06/2020). François was a PhD student at Laboratoire Jean Kuntzmann - LJK, but his thesis was financed by École Normale Supérieure (Paris). He was co-advised by myself (50%) and Édouard Oudet (LJK). The PhD thesis of François was focused on obstacle-type problems. In particular, he discovered a new variational approach for the computation of the cut locus and the λ -cut locus of the distance function on a compact Riemannian manifold.

VAREG - "Variational approach to the regularity of the free boundaries" financed by the program Horizon 2020.

Duration: 60 months, 1/6/2020 - 30/5/2024. **Volume:** 1,333kE.

Summary: This project is dedicated to the study of the regularity of the free boundaries via variational techniques as the isoperimetric and the logarithmic isoperimetric inequality.
